

# Lubitel 166+

Lomography presents a comeback of the most special kind. The hardworking Lomography creative team has been working relentlessly day and night to bring us this, new and improved, recreation of the original twin-lens, medium format Russian beauty.

**The upgraded classic guarantees unprecedented analogue photography pleasure:**

- A 35mm format function for a wonderful sprocket-hole look - in addition to the regular 120mm format
- Endless panorama function to shoot long-legged beauties
- Improved viewfinder to get a sharper focus on the object of desire
- With the Lubitel+ lens the fun starts at proximity of 0.8m – which is perfect for portraits and close-up shots
- New and easy zone focus mode with different distance settings (the same as the LC-A: 0.8m – 1.5m – 3m)
- On-camera exposure guide
- Standard hot shoe for Lomographic flashes (Colorsplash Flash, Diana+ Flash)
- A new feature premieres in the world of photography: the Lubitel+ gives you the control to rewind your 120mm films back one, two or more frames for instant creation of double and multiple exposures.
- Interchangeable back for future surprises!

With these novelties you will become a Lubitel 166+ enthusiast in no time. The lightweight plastic body makes it easy to bring anywhere and everywhere you go.
